

HSI AUTHORIZED TRAINING CENTER

HSI Health & Emergency Care Training

Prepare employees to respond. Practice lifesaving skills. Support workplace readiness.

CPR • AED • FIRST AID • BLOODBORNE PATHOGENS

CPR/AED/First Aid onsite • Bloodborne Pathogens in person only

Version 1.2 • Current as of September 18, 2026
Current website, Eventbrite listing, and accepted proposal control.

Emergency confidence comes from practiced skills

**Recognize.
Respond.
Act.**

HSI Health combines instruction, practice, assessment, and workplace preparation.

Why this training matters

Prepare before an emergency. Build a consistent response while professional help is on the way.

Practice essential skills. Use manikins, AED trainers, first-aid supplies, and instructor feedback.

Match the credential to the need. Select CPR/AED, First Aid, the combined course, or annual Bloodborne Pathogens training.

Protect workplace readiness. Coordinate age ranges, responder roles, exposure risks, equipment, and site procedures.

Training supports preparedness; employers still control plans, staffing, equipment, and site procedures

Three HSI paths meet different workplace needs

01 CPR & AED

Hands-on certification for employees who may need to recognize cardiac arrest, activate EMS, perform CPR, and use an AED.

Adult certification is most common; child and infant options are available when requested in the approved scope.

02 FIRST AID

Standalone or combined training for employees who may respond to sudden illness, injury, bleeding, shock, or environmental emergencies.

Often combined with CPR/AED so workplace responders build one coordinated emergency-response skill set.

03 HSI BBP

Two-hour annual training for employees whose duties may involve occupational exposure to blood or other potentially infectious materials.

Available in person only. The employer identifies covered jobs and provides workplace-specific procedures.

Organizations may combine CPR/AED/First Aid with BBP; Cindy confirms the scope, schedule, and complete price.

Compare HSI delivery, price, and certification

Current Tampa Bay Training pricing; confirm the selected age range and course scope before purchase.

Course / format	Best fit	Length	Delivery	Tuition	Completion
CPR, AED & First Aid	Workplace / lay responders	Up to 8 hrs	Onsite	\$90	Exams + skills; HSI cert, 2 yrs
CPR & AED only	Cardiac-response roles	Up to 8 hrs	Onsite	\$90	Exam + skills; HSI cert, 2 yrs
First Aid only	First-aid response roles	Up to 8 hrs	Onsite	\$90	Exam + skills; HSI cert, 2 yrs
Bloodborne Pathogens	Occupational-exposure roles	2 hrs	In person only	\$60	Exam; HSI cert, 1 yr
Combined team plan	Teams needing both credentials	Cindy confirms	Onsite	Quote	Separate HSI credentials

Adult-only is most common; adult/child/infant options are available. Cindy confirms any combined agenda and complete price before booking.

CPR/AED certification requires observed performance

WHO

Employees expected or encouraged to respond

Workplace responders in local government, public works, utilities, construction, facilities, parks, offices, and professional organizations.

TRAINING

Recognize cardiac arrest and act

Activate emergency medical services, perform CPR within the selected age range, use an AED trainer, and continue care until professional help arrives.

ASSESSMENT

Written examination and hands-on skills

Participants must complete the required knowledge assessment and demonstrate the applicable CPR and AED skills under instructor observation.

DOCUMENTATION

HSI digital certification

Valid for two years. A paper certification card must be requested at registration so it can be ordered in advance.

\$90 per participant • selected option scheduled for up to one eight-hour day • onsite only

First Aid training turns knowledge into practical response

ROLE

WORKPLACE RESPONSE

Employees who may provide immediate care for sudden illness or injury until emergency medical services arrive.

Instruction addresses scene safety, initial assessment, bleeding, shock, common medical emergencies, injuries, and environmental emergencies.

First Aid may be taken alone or combined with CPR/AED.

Full certification is onsite because practice and evaluation are required.

ASSESSMENT

SKILLS

Schedule depends on the selected certification option and may extend up to one eight-hour day.

Multiple-choice examination and required hands-on practice.

Participants complete the skills included in the approved course scope.

HSI digital certification is valid for two years.

A paper card must be requested at registration.

\$90 per participant • selected option scheduled for up to one eight-hour day • onsite only

Bloodborne Pathogens is annual, job-connected training

2 HOURS

\$60 per participant

In person only • HSI certification valid one year • private or limited public enrollment

Annual HSI training for exposure-risk employees

Reduce exposure risk

Transmission • Universal Precautions • controls • PPE

Understand how exposure may occur and how engineering controls, work-practice controls, housekeeping, PPE, and exposure response reduce risk.

Connect training to the employer's program

Exposure plan • vaccination • incident reporting

The employer identifies covered jobs, explains site procedures, addresses vaccination and post-exposure follow-up, and maintains required records.

Training supports the employer's program; it does not establish full compliance by itself.

Choose the delivery path that matches the class

LIMITED PUBLIC

Public seats are offered when a host opens a scheduled class
Review Eventbrite for current dates
CPR/First Aid public classes are onsite
BBP is in person only
Contact Cindy if the needed class is not listed

PRIVATE ONSITE

All CPR/AED/First Aid options
Bloodborne Pathogens also available
Seven-participant billing minimum
Maximum 20 participants
Host provides a suitable training space

IN-PERSON BBP

Two-hour instructor-led course
In-person delivery only
Full attendance and participation
\$60 per participant
Private or limited public enrollment

TBT currently offers no self-paced HSI Health certification; CPR/AED/First Aid requires onsite skills.

HSI certification follows attendance, assessment, and skill

01 PREPARE

Provide the participant's name exactly as it should appear, an individual email, the selected age range, and any advance paper-card or accommodation request.

02 ATTEND

Attend the full session, participate in practice and discussion, follow instructor safety directions, and complete the assigned course activities.

03 DEMONSTRATE

Complete the applicable written examination. CPR/AED and First Aid participants must also demonstrate the required physical skills.

04 RECEIVE

Receive the HSI digital credential: two years for CPR/AED/First Aid and one year for BBP. The participant and employer track renewal.

Basic policies protect training quality and credential records

Private onsite capacity

Seven-participant billing minimum; maximum 20. Fewer may attend, but the organization is billed for seven. Instructor staffing and equipment are planned in advance.

Host and participant preparation

Provide a clean room, tables and chairs, clear floor space, and a display when available. Confirm age range, roster, responder roles, and BBP site procedures.

Delivery boundaries

CPR/AED/First Aid certification is onsite. BBP is in person only. TBT currently offers no self-paced HSI Health certification.

Credential delivery

Digital HSI credentials are standard. Request a paper card at registration. Accurate names and individual emails help prevent processing delays and fees.

Accepted proposal and current policies control • Questions: Cindy Torres • [813-360-1526](tel:813-360-1526) • service@tampabaytraining.com

Registration takes three deliberate steps

CHOOSE & VERIFY

1

Confirm the right HSI option

Match the employee's response role, required age range, occupational-exposure determination, credential need, and employer acceptance requirement.

REGISTER & PREPARE

2

Register and coordinate

Use Eventbrite for advertised public classes. Contact Cindy for private training, groups, combined programs, paper cards, accommodations, and facility planning.

ATTEND & COMPLETE

3

Complete every requirement

Attend the full session, complete the applicable examination, demonstrate required skills, monitor the credential email, and retain renewal information.
